AgriAssist: A Smart Agricultural Web Platform

ABSTRACT

AgriAssist is a web-based application designed to provide farmers with essential agricultural insights for better decision-making. It includes a user authentication system for secure access and personalized data management. Key features include Weather Information for real-time updates, Soil Analysis for soil-based recommendations, Market Prices for updated vegetable rates, and Crop Recommendation for selecting the best crops based on soil and season.

To enhance accessibility, AgriAssist supports multiple languages, including English, Hindi, Tamil, Telugu, and Malayalam. The platform offers a user-friendly and responsive interface, ensuring smooth navigation. By utilizing local storage for authentication and data management, it provides a seamless experience. AgriAssist aims to empower farmers with data-driven insights, improving agricultural planning and productivity.
